Original 470: 243760001319481

Eastmont School District 206 is seeking a Petition for Waiver 02-6.

We were just contacted by Mark Nadell a FCC representative for additional information on our request.

When we attempted to file our 471 we completed all of the steps, selected all of the appropriate check boxes and pressed the button to certify. We received an error at that point and the system prevented us from submitting. I'm sorry I do not remember the exact verbiage but it implied we had missed our filing window. In all honesty we had missed the filing window by a couple weeks, we assumed that not being able to certify the 471 was expected behavior at that point.

After researching on USAC's website we found the only recourse was to file a Petition for Waiver with the FCC. After speaking with Mark from the FCC it appears there may have been confusion and we should have been able to submit the 471 even after the window had closed.

Please let us know what other documentation you need to evaluate our request.

We appreciate your consideration.
